Education

Amrita Vishwa Vidyapeetham

Bachelor of Technology, Computer Science and Engineering | CGPA: 8.43/10

Aug. 2023 – Aug. 2027

Coimbatore, Tamil Nadu

Experience

Software Developer Intern | Telesto Energy

Sep. 2025 – Mar. 2026

React.js | Node.js | Cloud Storage | Data Visualization

Remote

- Built a full-stack platform to upload, store, and retrieve large SEG-Y seismic files in the cloud, enabling geoscientists to access datasets in seconds instead of minutes.
- Engineered interactive seismic data visualizations directly in-browser, eliminating the need for external tools and significantly reducing analysis setup time.
- Optimized the entire pipeline to meet company performance standards; solution was reviewed and approved by the client as production-ready.

Full Stack Developer Intern | Sudha Software Solutions | Certificates

June 2025 – July 2025

Next.js | Node.js | MongoDB | Certified Full Stack Developer

Remote

- Designed and deployed 6+ scalable full-stack modules; implemented secure authentication, Cloudinary media storage, and CI/CD pipelines, cutting deployment time by 35%.
- Awarded **Best Intern** out of the entire cohort; earned Certified Full Stack Developer credential along with Experience Letter and Letter of Recommendation.

Projects

Growgle – Agentic AI Career Intelligence Platform | GitHub | Demo

- 2nd Place** at a competitive hackathon (Rs. 25,000 prize); originally shortlisted at the Google GenAI Exchange Hackathon among thousands of submissions.
- Architected a multi-agent AI system using Google Agent Development Kit (ADK) with 7 autonomous agents (career planning, skill-gap analysis, job matching, RAG intelligence, feedback adaptation) exposed via secure REST APIs.
- Built a RAG-powered pipeline combining vector embeddings and structured datasets to deliver contextual career insights, job-fit scoring, and adaptive roadmaps at scale.

Lab Equipment Management System (LEMS) | Frontend | Backend | Demo

- Adopted by Amudha Lab, Amrita Vishwa Vidyapeetham to manage 100+ assets in production, automating 90% of requests and cutting manual workflow time by 75%.
- Built full-stack using Next.js, Node.js, and MongoDB with secure authentication, modular microservices, real-time request tracking, and responsive design across devices.

Intelligent Image Classifier Platform | GitHub | Demo

- Trained a CNN (11M+ parameters) achieving 91.7% accuracy on bird species classification; deployed via Flask with real-time inference optimized through Google Drive API and Render.

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, SQL (MySQL)

Web & Frameworks: Flutter, Dart, React.js, Next.js, Node.js, Express.js, Flask, FastAPI

State Management & APIs: Redux, TanStack, RESTful APIs

Databases & Backend: MongoDB, MySQL, Postgres, Firebase, Cloudinary, Authentication & Authorization

ML & Data: TensorFlow, Scikit-learn, OpenCV, Data Visualization, Power BI

Cloud & DevOps: Render, Docker, CI/CD, Git/GitHub, Kafka, Linux (Ubuntu)

Practices: OOP, Agile/Scrum, SDLC, Microservices

Awards & Leadership

- 2nd place, Guidewire DEVTrails University hackathon** | Built Continuum — an AI-powered parametric insurance platform for gig workers; auto-detects disruptions and pays out via UPI. Selected from 18,000+ students, 4,400+ teams, 30 universities across India (Rs. 1,50,000 prize)
- Hackathon Winner (x2)** | 1st Place, Anokha Techfest – built MedConnect in 24-hr sprint (Rs. 25,000 prize) | 2nd Place with Growgle at competitive hackathon (Rs. 25,000 prize)
- Winner, Vertex Innovate 2025** | Awarded for excellence in real-world tech application. *View Certificate*
- Finalist, Cisco ThingQubator** | Top 10 of 500+ entries for an IoT-based accident detection system with real-time emergency alerts.
- Department Coordinator, Anokha '26** | Led department-level operations for Amrita Vishwa Vidyapeetham's flagship national-level technical fest.
